

R-20U

UHF WIDE-BAND
 DIRECTIONAL ANTENNA

Description

The R-20U directional antenna provides enhanced signal pickup for UHF wireless microphone systems operating in the 600-900MHz frequency range, and is compatible with new foreign telecommunications regulations. Lightweight, structurally durable, UV- degradable ABS cover sheets that provide long life and consistent performance under harsh operating conditions.

Product Specification

Frequency Range:	600MHz-900 MHZ
Gain:	7dBi
Impedance:	50 Ω
Horizontal flap width:	80 °
Vertical flap width:	60 °
Polarization:	Vertical
VSWR:	≤ 2.0 :1
Connector:	BNC
Dimensions (mm):	210(H) × 180(W) × 44(D)
Weight:	Approximately 300g
